Asta Powerproject: The power behind successful projects

Introducing Asta Powerproject

First launched in 1988, Asta Powerproject is a powerful, project, portfolio and resource management solution designed to support the way construction planners work and has evolved with their input so that it specifically meets the needs of the industry. Used by large and small businesses alike, it is the preferred software of thousands of construction professionals.

Asta Powerproject has been used on some of the world's most complex construction projects including: Europe's tallest building, The Shard; The Reichstag in Berlin; Banora Point Highway in Australia; Durban International Airport and the rebuilding of Christchurch New Zealand.

Why choose Asta Powerproject?

- ◆ **Easy-to-use** but extremely powerful
- ◆ **Fully scalable** so suits projects and portfolios of all sizes
- ◆ **Superior presentation** of project plans and simpler printing
- ◆ Filtering for **easier management** of sub-contractors
- ◆ **Better protection against litigation caused by delay**
- ◆ **Cost-effective** licensing options: choose one-user or shared licences – see page 3
- ◆ **Enterprise option** for multi-user, multi-project, real-time access – see page 3
- ◆ **Affordable 4D planning** – link project plans to 3D models within a single application – see page 4
- ◆ **Site Progress Mobile** – update project information with remotely recorded progress – see page 5
- ◆ **Provides dashboard reporting** for quick executive summaries of progress – see page 6
- ◆ **Easily integrates** with other software – see page 6
- ◆ **Construction-specific** training courses and expert support – see page 7

“Asta Powerproject is a lot simpler to read than Primavera and others. I like it because of how you can drop the progress lines down, put resource schedules together, and run bars alongside each other in order to do comparisons. It has lots of uses.”

Cost-effective, flexible licensing and deployment options

Choose the best option for your business from two licence types.

Single User:

Simplest licence, where the software can be accessed on one specific machine only.

Concurrent User:

A cost-effective way of letting more users have access to the software by sharing licences and bringing down the overall cost of purchase considerably.

Share plans with anyone with a **FREE ASTA PROJECT VIEWER**

"Asta's shared licensing model makes it much more economical than other software such as MS Project for which you need to buy a full licence for every user."

Clive Bassett
Financial Director

Visibility of Project Health

Asta Powerproject Enterprise

Asta Powerproject Enterprise is ideal where a number of people need to access and update a central plan. It gives organisation-wide visibility over all project-related data so that multiple users can work collaboratively viewing real-time information.

Both single and concurrent user options are available with enterprise access.

With Asta Powerproject Enterprise you can:

- ◆ Centrally manage all your projects for optimum efficiency
- ◆ Enable a number of people to access and work on the same project plan at the same time
- ◆ Collect data from multiple sites quickly and easily and input it directly into the project plan
- ◆ Control project costs, income and cash flow across your portfolio

Talk to us about the best option for your team.

A man wearing a yellow hard hat and a dark business suit over a light blue shirt is looking at a smartphone. He is standing on a construction site, with blurred cranes and industrial structures in the background. The image is framed by a large white triangle pointing towards the top right corner.

Each user sees only the relevant tasks and progress check lists for which they have responsibility. The app is free to install, with the use of the service charged according to the number of active jobs exported to the secure cloud storage area.

- “The app is such a quick and simple way to capture progress information.”**

[illegible]

-
- A photograph showing a person's hands holding a white tablet. The person is wearing a white long-sleeved shirt. The tablet is held horizontally, and the person's right index finger is touching the screen. In the background, a white computer keyboard is visible on a desk. To the right of the keyboard, a white smartphone lies flat on the desk. The scene is brightly lit, and the background is slightly blurred. A large red triangle is overlaid on the top right corner of the image.

Dashboard reporting

Business Intelligence is a powerful analytical tool which enables you to easily produce accurate, professional looking dashboard reports on the core business metrics required by the senior managers within your organisation without having to collate the data manually. With Business Intelligence you can:

- ◆ Receive early warning of any delays or issues in meeting deadlines
- ◆ See complete visibility over the status of all your projects, resources and costs
- ◆ Combine Asta Powerproject generated data with third party data sources

Easy integration with other software

Asta Powerproject enables you to open files from and integrate with other systems to support collaborative working and help you exchange project data easily with people working on different software if needed.

- ◆ Open files from Microsoft Project, Oracle Primavera and SureTrak
- ◆ Save Asta Powerproject files into formats that can be opened in such systems
- ◆ Templates are provided for opening files from other formats for familiar presentation
- ◆ Easy integration with systems such as estimating applications (including our Bidcon product), enterprise resource planning (ERP) systems and BIM tools

"We have managed to integrate hundreds of projects and align SAP data with our programme data with a few clicks of the mouse."

Getting you started.

With over 25 years of experience of providing our project, portfolio and resource management solutions to the construction and engineering industries, we understand the best ways for you to maximise the benefits and return from your investment in Asta Powerproject through:

Training

We provide a wide range of training to help both new and more experienced users to improve their skills in working with Asta Powerproject.

We can tailor courses to your company requirements and provide web-based training sessions.

Consultancy and Implementation

Our in-house team of dedicated project management software professionals has wide experience of helping customers to adapt and customise their Asta Powerproject solution should this be required.

Support

Our support and upgrade package will help you to get the most out of your investment in our software and includes the free provision of all maintenance updates and upgrades.

"One big advantage with Asta is the helpdesk. I know that if ever I get stuck I can just phone them, and they'll help me out."
