Excel Starter®, Online Office 365® and OpenOffice® are not supported. 64-bit Microsoft Office is required to export Access 2007, dBase IV, Text and CSV formats. Microsoft .NET Framework 4.6 or later.

Notes:

- Autodesk® Inventor LT™ and Autodesk® Vault must both be the same language on a given computer. English versions of these applications will run on any language

operating system. Other language versions of these applications will run on operating systems of that same language.

2. Autodesk® Inventor LT™ is optimized to take advantage of the SSE2 extended instruction sets supported on Pentium 4, AMD Athlon 64, and AMD Opteron processors. Inventor LT will not install on computers that do not support SSE2. Several utilities are available on the Internet that report CPUID including supported instructions sets.
3. Autodesk recommends settings which allow Microsoft Windows to manage virtual memory as needed. There should always be at least twice as much free hard disk space as system memory (RAM).
4. DVD-ROM drive is not required if installing from USB or software download.
5. The multimedia learning components of the Inventor Help system, such as the UI Video Tour, Command Reference, and Show Me animations, require Adobe Flash Player 10. If it is not already installed, you can [download it from the Adobe website](#).
